

NOTICE OF APPLICATION FOR AQUATIC MANAGEMENT PERMIT

Lake Restoration, Inc. representing Spooner Lake Protection and Rehabilitation District (SLD) is applying for a permit under NR107 Wisconsin administrative code from the Wisconsin Department of Natural Resources to target nuisance and aquatic vegetation in 2 navigational channels.

The proposed project applies to the following geographical area: A total treatment area of 7.56 total acres encompassing Spooner Lake East Navigational Channel [8,000 ft. x 30 ft.] with a treatment area of 5.15 acres at 5-foot average depth and Spooner Lake West Navigational Channel [3,500 ft. x 30 ft.] with a treatment area of 2.41 acres at 5-foot average depth.

Lake Restoration will treat these nuisance conditions with the EPA approved products: Diquat and Aquathol-K. The proposed products have no restrictions for swimming or fish consumption.

The proposed treatment will occur between June 1, 2025 and July 31, 2025 depending on optimal lake water temperatures and the active growth cycle of the targeted nuisance plants.
